

FLOOD-CBA project:

Establishing a sustainable **'Knowledge Platform'** for the use of stakeholders dealing with the cost-benefit analysis of flood prevention measures in the EU:

1. Facilitate the collection, assessment and the exchange of information amongst stakeholders and provide overview and detail on current models and best practices;
2. Consolidate the methodology and data sources and enhance the comparability of results of Cost-Benefit Analyses;
3. Strengthen the performance of the existing prevention mechanisms especially in the project participating countries;
4. Promote the transnational cooperation of competent bodies all over Europe.
